

WebRTC Setup Instructions for Windows platform

1. Prerequisite software:

- Windows 7 or later.
 - A 64 bit OS is **highly** recommended as building on 32 bit OS is constantly becoming harder, is a lot slower and is not actively maintained.
 - At least 60 GB of free space in an NTFS volume. Tip: having the chromium source in a SSD drive greatly speeds build times.
- Visual Studio 2010 Professional or Standard.
- **Install [Windows SDK 7.1](#)**
- **[June 2010 DirectX SDK](#).**
- Python (download [Active State Python](#))

2. Install Visual Studio 2010

1. Make sure "X64 Compilers and Tools" are installed.
2. **Install [VS2010 SP1](#).**

3. Install [Windows SDK 7.1](#). Make sure x64 compiler and tools are installed.

4. Install the [June 2010 DirectX SDK](#)

Note: If your install fails with the "Error Code: S1023" you may need to uninstall "Microsoft Visual C++ 2010 x64 Redistributable". See this tip from stackoverflow: <http://stackoverflow.com/questions/4102259/directx-sdk-june-2010-installation-problems-error-code-s1023>

5. Install Python

6. Install Chromium Depot Tools

1. Download [Chromium Depot Tools](#)
2. **Follow the instructions on the webpage carefully**

7.
